- Family, as a primitive institution.

Note.—The Family as the nucleus out of which sprang the earliest forms of law and primitive judicial conceptions of proprietary rights, is treated at large by Sir Henry Maine in his 'Ancient Law.' In his 'Village Communities' and his 'Early history of Institutions,' he dwells more largely upon the family as the type of archaic society. Much light is thrown upon the relations of the early family to legal and political institutions and ideas among the Teutonic peoples, by Von Maurer and others, a list of whose writings is appended to Maine's 'Village Communities,' p. 398. The place of the family in Greek and Roman history is discussed at large in the 'Ancient City' of Fustel de Coulanges, and incidentally in Cox's 'History of Greece,' and Freeman's 'Comparative Politics.' Sohn's 'Fränkische Reichs- und Gerichtsverfassung,' and Laveleye's 'La Propriété et ses formes primitives,' will be of service in studying the family in its connection with origin of proprietary rights. Anglo-Saxon family law is treated of in a recent volume of 'Essays on Anglo-Saxon Law,' by Henry Adams and others. A very complete list of authorities is prefixed. The place of the family in sociological development is touched upon by Herbert Spencer, in his 'Principles of Sociology,' and by John Fiske in his 'Cosmic philosophy' (chapter on the Evolution of Society).—W.
